1 Problem

Tourists are often overwhelmed by possibilities when visiting a new place. Typical tourist options are outdated.

2 Concept

An urban exploration game that takes users through the city in an engaging way.

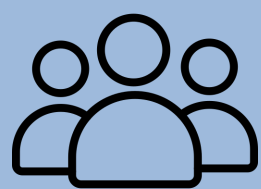

Users get attracted through a public kiosk where they get the necessary information.

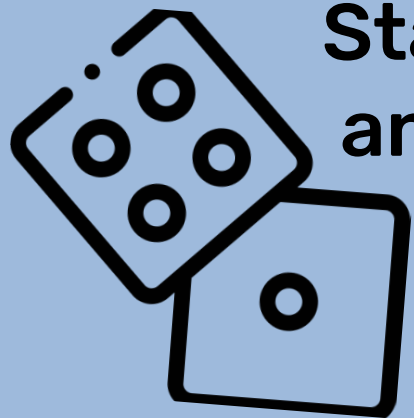

The Application 3

Open the website

Join a room with your friends

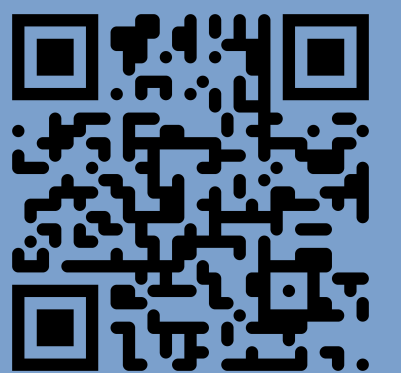

Start the game and begin the tour

Win the most points and beat your friends!

Find the QR codes to earn points

4 Benefits

Our service offers tourists a fun and modern way to explore your city. Local businesses can advertise their services through the prizes. The public display assures that the web-app can be easily found. And many more!

Design 5

Public Display

Unique

Interactive

Supported by solar power

Noticeable design to attract attention
